More Gas Wasted the Better for Them -Wells May Revive.

Special to the Indianapolis Journal. MUNCIE, Ind., Aug. 7 .- Since the meeting executive committee of the Manufacturers' Gas Waste Association in this city Tuesday night it has developed that the oil operators of the gas belt will oppose the efforts of the manufacturers to stop the pumping of natural gas. Successful working of the oil territory depends on the failure of the gas. Under the Indiana statutes oil wells cannot be operated where there is gas in the wells, and where the gas can be utilized the oil cannot be obtained because the gas holds it back. It is generally admitted that as gas has decreased in pressure in a large area of the Indiana gas selt oil has come in. The theory is that the oll lies in strata beneath the gas, and that so long as the reservoir of gas is there the oil will be kept down. E. B. Ball, of the Ball Brothers' fruit ja factories of Muncie, says that when others have agreed to do away with their pumping stations Ball Brothers will dismantle their station, which represents an investment of The executive committee agreed that the dismantling of all pumping stations would result in the restoration of the gas pressure of five years ago. Men are like women. I believe that no female can be respectable in a Mother Hubbard, and I know that as soon as you invite a male guest to take off his coat and wreck Wednesday afternoon and four not vest he becomes a licentiate. He owns your house, your dog, your child and your wife. There is great respectability in a coat, even if it be a seersucker. Keep on hand a lot of seersuckers, so that when Library; Mary Eileen Ahern, editor Public your friends come to see you these hot days they may put them on and be polite. Nothing so much reduces the gentility of David Starr Jordan Elated Over His folk as the undress. A woman en deshabile is capable of any crime, and a man at dinner in a shirtwaist is a villain.

CORCE"

He Corralled a Negro That Had Stolen a Bicycle.

Doc Lung, a Chinaman on Massachusetts avenue, has become well enough acquainted with American ways to not be outdone by a negro who attempted to sell him a stolen article. Joseph Shaler, a small negro boy, stole a bicycle last night from the corner of Indiana avenue and Ohio street. He rode the wheel out Massachusetts avenue, where he saw Doc Lung standing in his door. Shaler dismounted and asked Doc Lung if he wanted to buy a good wheel. The latter became suspicious and asked Shaler for his bill of sale. The wheel was apparently new and Shaler seemed more than anxious to dispose of it. He first offered it to the Chinaman for \$8 and then lowered the price until he reached \$3.50. The Chinaman saw Patrolmen Jordan and Condell about one block away and held the negro until they came near. Then he pretended he was about to buy the wheel and the police caught Shaler. The latter confessed that he had stolen the wheel.

wonder of the age. He was soon doing a rushing business, telling mining men when stocks were going up, advising women in affairs of the heart, etc. For this a moderate recompense was asked and freely paid by the patrons. To onlookers business seemed to be increasing, but when the time for opening the office came one morning the professor of palmistry did not appear. The public then learned for the first time that he was the originator and proprietor of a brand new swindle. He represented to each of his patrons that if they would give him a \$20 gold piece he would magnetize it so that they would have power to read the future, when they consulted the gold piece, just as he read it in the palm. They were to call and receive their magnetized gold pieces the day on which the palm specialist failed to arrive. They called, but they went away without their gold and with a conviction that the magnetic influence between the professor's fingers and the gold pieces was really marvelous. Residents of Salt Lake do not take much stock in palmistry now.
